## INCENTIVE SYSTEMS AND COMPARISON TABLE

Development Incentives	Criteria	Examples
Technology Incentives	✓ Value-added investments in medium-high and high-technology products listed in the Ministry's priority product list will be supported.	▪ Medium-high tech and high-tech products
Local Development Incentives	✓ Support will be provided by the Ministry through a call-based procedure for local development topics specifically determined for each province.	▪ Support for agriculture and livestock in rural cities, manufacturing and service sectors in areas with a high concentration of skilled labor and population, etc.
Strategic Incentives	<ul style="list-style-type: none"> <li>✓ A minimum of 30% value-added in production</li> <li>✓ At least 20% equity capital in the investment</li> <li>✓ The ratio of imports to exports should be at most 70%</li> <li>✓ Imports of the product exceeding USD 50 million in the past year</li> <li>✓ Listed among the strategic products determined by the Ministry</li> </ul>	▪ Applicable to all sectors if at least 3 criteria are met.
Sectoral and Regional Incentives	Criteria	Examples
Priority Incentives	<ul style="list-style-type: none"> <li>✓ Investments in products included in the Ministry's priority product list will be supported.</li> <li>✓ A minimum investment threshold has been set at TRY 627 million for high-tech investments and TRY 1,25 billion for medium-high tech investments.</li> </ul>	▪ Automotive, pharmaceuticals and medical devices, electronic products, etc. (All priority investment areas are listed in Annex-2)
Target Incentives	✓ Regional support will be provided based on sectoral investment areas and regional characteristics.	▪ Applicable to all sectors excluding specific investment areas.
Project Based Incentives	Criteria	Examples
HIT-30 Program	<ul style="list-style-type: none"> <li>✓ A minimum fixed investment amount of TRY 2 billion (~ USD 47 million)</li> <li>✓ Production of products listed in the "Products and Technologies" section shared on the HIT-30 program website.</li> </ul>	▪ Mobility, semiconductors, green energy, healthy living, digital technologies, communications and space, advanced manufacturing, value chain investments, etc.

# SUPPORT ITEMS FOR DEVELOPMENT INCENTIVES

## ANNEX 4 – CALCULATION OF TAX REDUCTION

### How Does the Tax Reduction Support Work?

Investment Amount: TRY 1,000,000,000

Investment Type: Priority Investment

Contribution Rate to Investment: 30%

Tax Reduction Rate: 60%

### Step 1: Calculating the Support Cap

Contribution to Investment:  $\text{TRY } 1,000,000,000 \times 0.30 = \text{TRY } 300,000,000$

- ✓ This support amount represents the upper limit of the tax reduction support. The unused portion of this support is increased annually at the revaluation rate determined each year.

### Step 2: Calculating Annual Tax Reduction

Assumed Annual Net Profit: TRY 200,000,000

Corporate Tax (25%):  $\text{TRY } 200,000,000 \times 0.25 = \text{TRY } 50,000,000$

Tax Reduction (60%):  $\text{TRY } 50,000,000 \times 0.60 = \text{TRY } 30,000,000$

- ✓ Thus, the investor will pay TRY 30,000,000 less in taxes each year.

### Step 3: Explanation of Total Tax Reduction

The payable corporate tax:  $\text{TRY } 50,000,000 - \text{TRY } 30,000,000 = \text{TRY } 20,000,000$

The investor will benefit from a tax advantage of TRY 30,000,000 annually.

Since the total support amount is TRY 300,000,000:  $\text{TRY } 300,000,000 \div \text{TRY } 30,000,000 = 10$  years

- ✓ According to the legislation, the right to tax reduction can be used for a maximum of 10 fiscal periods.
- ✓ The calculation of the tax reduction, the amount of advantage, and the financial conditions under which it will be utilized depend on the company's strategy and profitability in the income statement.
